Product: Blackboard Learn

Release: 9.1;SaaS

Service Pack: Learn October 2014 (9.1.201410.160373), SaaS, Learn 9.1 Q4 2015 (9.1.201510.1171621), Learn 9.1 Q2 2016 (3000.1.0-rel.52+991d)

Issue Description: When the Spell Checker is enabled in the VTBE, content that is re-edited and submitted with any additions or changes to the text in the VTBE causes adding of extra span tags in the HTML code for the text for each pre-existing misspelled word from before the edit.

Steps to Replicate:

1. Log in as *Administrator*
2. Create a **Course**
3. Quick enroll into the Course
4. Go to **Content** > **Tools** > Click on Wikis to create **Wiki**
5. Select **Link to Wiki** > Click on Create new wiki > Fill out form
6. Click **Submit**
7. Go to **Users and Groups** > Click on **Users** > Enroll Users > Create > Create a test student with Course Role of student
8. Click **Submit**
9. Logout and log in as the *Student*
10. Enter the new Course > click Content > The new Wiki
11. Add Submission > Enter some misspelled words and **Submit**
12. Edit Wiki Content > Note the old misspellings > Add one more misspelled word followed by a period. > **Submit**
13. Edit Wiki Content again > Add one more misspelled word followed by another period > **Submit**
14. Repeat step 13 as desired
15. Edit the Wiki content again, and this time expand the VTBE bar and hit **HTML source**

Expected Behavior:
Each misspelled word is wrapped in a single set of SPAN tags.

Observed Behavior:
Each misspelled word from each edit is wrapped in progressively more span tags.
